Bavaria's Largest Homes Exhibition

OUT AND ABOUT THE HOMES WITH EXPERTS

Bauzentrum Poing near Munich is Bavaria's largest homes exhibition. Discover the variety of architecture, innovation and living atmosphere in around 60 model homes directly on site.

Experience live how personal home preferences and building visions can be realized, and which structural engineering possibilities are available to make individual ideas come to life. Our experts on site will gladly advise you in detail.

A GOOD PLAN. JOY FOR LIFE.

A house is as diverse as life itself. So the house should always be adapted to life, rather than life to the house. In Bauzentrum Poing, you will learn how residents' demands on architecture, layouts and living atmosphere can be innovatively implemented. In guided tours, our specialists will show you, as private builders or construction and real estate specialists, which new trends and innovations in home building are possible.

OUR SPECIAL TOPICS AT A GLANCE

-  Eco-conscious. Energy Efficiency
-  Multifunctional. Multigenerational House
-  Recoverable. Sustainable Building
-  Intelligent. Smart Building

GUIDED TOUR

ENERGY EFFICIENCY

What funding and special financing programs are available for energy-efficient construction? How can energy efficiency best be realized and what needs to be considered already in the planning phase?

Energy-efficient building pays off. The more efficiently you use the energy in your home, the more independent you are from developments in the energy market.

A team of state-certified and independent energy consultants explain the art of energy-efficient construction.

- **Tour through two to four examples of energy-efficient model homes.**

GUIDED TOUR

MULTIGENERATIONAL HOUSE

How do you accommodate several generations under one roof? To be able to live together and nevertheless live independently of each other, good planning is a prerequisite: Spatial organization, floor plans, entrances, staircases and common areas must be well thought out.

Let our interior design specialists initiate you into the secrets of successful multigenerational houses and learn about the challenges multigenerational buildings pose and the solutions they offer.

- **Tour through two to four different model houses for multi-generation living.**

GUIDED TOUR

SUSTAINABLE BUILDING

The foundation for maintaining the value of your property over its entire life cycle is sustainable building. How do you use raw materials sustainably and how can water, wastewater and energy consumption be organized to reconcile environmental, economic and social factors?

On the “Trail of Innovative Ideas,” you will learn how to preserve the value of your property for the future and how to design an economically and ecologically reasonable circular raw materials economy for your home.

- **Tour through two to four selected sustainable building model homes.**

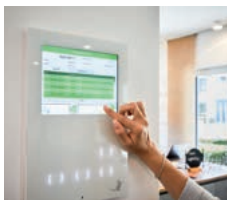

GUIDED TOUR

SMART BUILDING

How smart can houses be? What if your house was your personal energy manager or would take care of all relevant security issues independently? Already today, your house can relieve you of many tasks. To ensure your house is ready and compatible with the digitalization of coming years, several factors have to be considered in the planning.

The experts will show you how to prepare your home for the future in selected houses on site.

- **Tour through two to four different model homes with innovative building technology.**

EVERYTHING YOU WANT TO KNOW ABOUT THE GUIDED TOURS

The guided tours through Bauzentrum Poing are an experience: Our experts will show you what lies behind the façade. Go on an expedition with our specialists and experience the ideas and innovations that the selected model houses have to offer.

- Duration:** about 2 hours per tour
Model homes: two to four selected model homes
Time: Tuesday to Sunday between 10:00 and 17:00
individually bookable (except on event Sundays)
Meeting point: The tour guide awaits you in the foyer of the Technology Pavilion
